

Because XM, and SERIUS is a payed service just as DIRECTV, and DISH NETWORK, ther should be no complaint. My local TV broadcast networks aren't complainig that I receive ABC, NBC, FOX, and CBS from New York, and L.A.

I'm paying for what I listen to, so this should not even be a topic of discussion.

A little competition never hurt anyone. There is no monopoly here.

I think the problem is that they don't have control of the general public, as they used to have the monopoly.
